#### PROFESSIONAL EXPERIENCE

SDG Group | London, UK

Corporate Performance Management Consultant

June 2022 – December 2022

- Converted data into actionable insights to drive business performance and operational readiness
- Performed system benchmarking and reconciliation with proprietary software
- Managed ESG data-related projects, produced reports for effective communication with clients and stakeholders
- Conducted complex ESG data analysis, interpreted trends and patterns, and explored ways to enhance data quality, reliability, and consistency

insightsoftware | London, UK

Professional Services Consultant

June 2021 – March 2022

- Supervised all phases of client reporting and software implementation projects
- Developed, set up, and configured prototypes with proprietary software
- Designed bespoke financial reporting solutions by integrating with ERP/EPM systems
- Worked with cross-functional teams to develop strategies and recommendations for clients
- Performed data analytics and forecasting review for over 50 training sessions; compiled and reported analytical results and recommended practical improvements
- Analysed, organised, and integrated raw sustainability data to make it available for investment decisions and tracking of sustainability paths

Minerva Analytics | Witham, UK

Data/Research Analyst

October 2019 – June 2021

- Evaluated company ESG and TCFD operational KPIs to establish the framework, tested against organisational distribution
- Performed in-depth key financial and ESG analyses and scores on 500+ Euronext companies
- Increased production quality by over 25% by improving in-depth market research
- Served as the ESG data steward for voting team and ensured the quality and accuracy of ESG data from agreed key ESG data providers
- Utilised enterprise PostgreSQL, database solutions, database design, and Power BI to evaluate business needs

Refinitiv (formerly Thomson Reuters) | London, UK / Gdynia, Poland

Financial Data Analyst

April 2017 – May 2019

- Performed fundamental equity valuation of 20+ Euronext companies to determine fair market value and make informed investment decisions
- Utilised system analytics to analyse large dataset to increase efficiency, resulting in a 15% reduction in operational costs
- Performed deep dive MySQL data querying within the ETL framework to derive convergence, resulting in a 20% improvement
- Conducted market research and competitive analysis to support business development efforts, resulting in a 15% increase in new client acquisition
- Utilised net present value (NPV) to establish a Cost Effectiveness Ratio (CER) for transitioning from single-use plastics to alternatives, internal, resulting in a 3.8% decrease in cost KPI

#### EDUCATION

MSc. Economics and Investment Banking	Nottingham Business School	September 2018 – December 2019
BSc. Marketing, Communication and Global Markets	Università degli Studi di Milano-Bicocca	September 2012 – March 2016
